# Monarch Vinyl Upholstery Cleaner

*Maintains material integrity, prolonging life of chairs*

**D**ental chair upholstery tends to crack after a while, making the chairs look old and dated, and not exactly instilling confidence in your patients to "have a seat" for their appointment.

To combat this issue, Air Techniques developed Monarch Vinyl Upholstery Cleaner to clean and care for all vinyl upholstery covers of treatment chairs and to maintain the value of dental treatment chairs and other artificial leather covers.

Made of a special blend of surfactants, silicone compounds and avocado oil, Monarch Vinyl Upholstery Cleaner cleans and cares intensively without leaving any residues and provides a silky gloss finish.

"My team loves it! In addition to being simple to use with the convenient spray, Monarch Vinyl Upholstery Cleaner removes stains from water and boots, and leaves a beautiful finish to the chairs," said *DPS* Advisory Board Member Dr. Sheri Doniger.

Monarch Vinyl Upholstery Cleaner can be applied with the included special sponge to rapidly

## 5 FEATURES YOU SHOULD KNOW ABOUT MONARCH VINYL UPHOLSTERY CLEANER:

- 1** Cleaning fluid for cleaning and caring of vinyl upholstery
- 2** Intensive cleaning effect, removes stains of all kind, spots, and discoloration
- 3** Excellent material compatibility, suitable for all covers made of artificial leather
- 4** Environmentally friendly, propellant-free spray bottle
- 5** Set with one 500-mL spray bottle and 10 special sponges

and thoroughly remove stubborn grime, stains, and discoloration caused by, for example, non-fast dyestuffs in clothing.

"Our chairs are always clean. I think it is better that the patients don't notice, as all they see is a clean chair, not a spotty, stained one," said Dr. Doniger.

The cleaner is indicated to be used 2 to 3 times per week or as required. Only a small amount is necessary to cover a large area to achieve excellent cleaning results.

"Monarch Vinyl Upholstery Cleaner is compatible with other sprays or wipes that are used for infection control—simply use the spray or wipe, wipe the surface material dry, and then apply the vinyl cleaner after," said Nicole Miller, Product Manager, Hygiene for Air Techniques.

Monarch Vinyl Upholstery Cleaner can be used without any problems on all artificial leather surfaces. The material tolerability of other leather surfaces should be checked on a concealed surface before application. The special sponges should not be used on genuine leather.

"Monarch Vinyl Upholstery Cleaner is a great addition to our office's care armamentarium," added Dr. Doniger.

## MEET THE SURFACES FAMILY

Air Techniques' Surfaces family of products includes Monarch Surface Disinfectant, available as a spray or wipes. The ethanol-based, bleach-free formula disinfects hard, non-porous surfaces killing a broad spectrum of pathogens, including tuberculosis, viruses, bacteria, and fungi, in just 1 minute. Fragrance-free, yet effective against odor-causing bacteria, Monarch Surface Disinfectant cleans and disinfects in one step, saving time and money.

\*Monarch Vinyl Upholstery Cleaner does not contain any disinfectant properties.

## BEFORE AND AFTER

Cleaning Comparison on Vinyl Upholstery  
Monarch Vinyl Upholstery Cleaner vs. Dish Soap

Dental chair stained with test soil and pen.

Left: cleaned with dish soap. Right: cleaned with Monarch Vinyl Upholstery Cleaner. The cleansing effect can be clearly seen on the cleaning utensils.

Remove excessive cleaning solution with a dry towelette. Remaining, unbound grime will be removed.
