Air Techniques Introduces Its Newest All-Star, Live-Action Trivia, and a Milestone Celebration at the Chicago Midwinter Meeting — Power Bars Included!

MELVILLE, N.Y. (February 17, 2026) — [Air Techniques, Inc.](#), a leading innovator and manufacturer of dental equipment, will unveil its newest all-star innovation, the [Dual Mojave Monitor LT](#), at the 2026 Chicago Midwinter Meeting. The newest addition to the Mojave Monitor LT Series will be showcased at **Booth 1429**, where attendees can get an up-close look at a **Big Suction, Small Machine, Double the Strength, Dry Dental Vacuum** solution.

In addition to the product debut, [Air Techniques](#) will host a **live-action trivia experience** for attendees to test their dental knowledge and a chance to win a \$250 gift card, along with swag and hands-on product demonstrations. The company will also celebrate a major milestone—**60 years of X-ray imaging excellence**—in partnership with **Dürr Dental**. To keep energy high, **power bars will be distributed on Friday**, February 20, on a first-come, first-served basis.

The [Dual Mojave Monitor LT](#) delivers added suction power and built-in redundancy without requiring additional utility-room space—essentially providing two systems in a single footprint. Like other systems in the Mojave Monitor LT Series, it offers power-on-demand, instantly expanding suction capacity by pairing with a second [Mojave Monitor LT](#). This tankless design supports growth, peak schedules, and future expansion with ease.

“As the most trusted name in dental equipment, [Air Techniques](#) continues to bring meaningful innovation to our community,” said **Scott Borden, Vice President of North American Sales and Marketing at Air Techniques**. “Our customers inspire us to engineer solutions that enhance clinical outcomes, improve patient satisfaction, and support long-term practice growth. The Dual Mojave Monitor LT delivers compact, powerful, and reliable suction while allowing dental practices to gradually expand capacity as more treatment rooms are outfitted. The next generation of dry vacuum is upon us, arriving to fit the needs of the modern dental practice, while also ‘fitting’ into even the tightest of mechanical rooms.”

Alongside the debut of the [Dual Mojave Monitor LT](#), attendees are invited to participate in Air Techniques’ engaging trivia challenge and celebrate **60 years of X-ray imaging innovation** with Air Techniques and Dürr Dental. The best is yet to come.

Visit [Air Techniques](#) at **Booth 1429** during the Chicago Midwinter Meeting to experience cutting-edge innovation and interactive booth activities.

[Air Techniques](#)’ comprehensive portfolio of [utility systems](#), [digital imaging solutions](#), and [dental merchandise](#) supports practices of all sizes—from single-chair offices to large universities and hospitals. As the **leading and largest manufacturer of dental air compressors and vacuum systems in North America**, Air Techniques continues to set the standard for performance and reliability.
