Air Techniques Unveils Groundbreaking SepaStar Amalgam Separator at CDA Presents in Anaheim

MELVILLE, New York (May 12, 2026) — **Air Techniques, Inc.**, a leading innovator and manufacturer of dental equipment, will debut its latest breakthrough, the [SepaStar Amalgam Separator](#), at booth #1638 during CDA Presents the Art and Science of Dentistry in Anaheim.

Engineered for today's dental practices, [SepaStar](#) sets a new standard in amalgam separation technology. It delivers robust, centralized separation with intelligent features that help practices stay compliant, safeguard equipment, and boost operational efficiency.

With advanced engineering and simplified maintenance, [SepaStar](#) provides dental professionals with a reliable, streamlined solution for managing amalgam waste. Supporting environmentally responsible dentistry, the system integrates smoothly into practice workflows and demonstrates Air Techniques' ongoing commitment to innovation, performance, and sustainability.

Visitors to booth #1638 can experience live demonstrations of [SepaStar](#) in action and discover how it is transforming utility room operations to meet evolving industry standards.

"[SepaStar](#) was developed to meet the increasing demand for smarter, more efficient amalgam separation in modern dental practices," said **Scott Borden, Vice President of North American Sales and Marketing at Air Techniques**. "We are thrilled to unveil this innovation at CDA Anaheim and showcase how Air Techniques remains at the forefront of delivering solutions that enhance performance and promote environmental stewardship."

Alongside [SepaStar](#), Air Techniques will present a suite of advanced dental utility room, imaging solutions, and merchandise, designed to elevate efficiency, reliability, and patient care.
