Air Techniques Introduces Mojave LT Compact Dry Vacuum

MELVILLE, New York — (November 21, 2017) — [Air Techniques, Inc.](#), a leading innovator and manufacturer of dental equipment, has announced their latest dry vacuum system, the [Mojave LT](#). The new Mojave LT will be on display at the Air Techniques Booth 3401 during the upcoming Greater New York Dental Meeting.

The [Mojave LT](#) is Air Techniques' latest technological achievement for their high-quality line of dental vacuum systems. Designed to replace conventional liquid ring pumps and to be completely 100% water-free, the [LT](#) ditches the collection tank for a motor driven air/water separator. [Mojave LT](#) has been engineered to deliver the highest performance while staying nearly silent. The compact size of the LT allows it be installed in any practice, even inside cabinets. Equipped with a vibrant multi-color touch screen display, the LT is constantly monitoring itself to make sure it's running optimally at all times. It easily connects with NEO Pulse front-of-office software to complete the most advanced utility room monitoring system available.

"We are very excited to introduce the [Mojave LT](#) at the Greater New York Dental Meeting," said Gregory Kass, Product Manager of Utility Equipment. The [Mojave LT](#) is technically advanced and offers today's dental professionals a fresh, new choice when it comes to choosing a dry vacuum system for their practice."

[Mojave LT](#) joins the established line of [Mojave dry vacuum systems](#) from Air Techniques. The current [Mojave models](#) are capable of supporting practices from three simultaneous users, all the way up to sixty simultaneous users. Mojave is designed to meet the needs of any office – with high performance, high efficiency and low operational costs.
