Air Techniques Shines a New Light on CamX[®] Spectra Caries Detection Aid and Introduces CamX[®] Elara Intraoral Camera

MELVILLE, New York — (August 1, 2016) — [Air Techniques, Inc.](http://www.airtechniques.com), a leading innovator and manufacturer of dental equipment, announces the next generation of [CamX Spectra](#) Caries Detection Aid and debuts [CamX Elara](#), a new intraoral camera.

[CamX Spectra and CamX Elara](#) are dental's perfect pair. The new [CamX family](#) of products from Air Techniques provides invaluable support of dental treatments and enhances patient understanding of necessary treatment. They are the perfect pair to tell patients the complete story of their oral health.

"The new CamX Spectra and Elara offer a modern, sleek design that combines ergonomic excellence with sophisticated caries detection and intraoral camera functionality," said Lindsay Viola, Product Manager of Diagnostic Systems. "Our new cameras offer benefits from patient communication and caries diagnostics to documentation and tracking patient hygiene or caries progress."

Beautifully designed, not only do their features distinguish the new [CamX cameras](#), they also satisfy all ergonomic demands. The cameras' sturdy and lightweight design fit comfortably in any practitioner's hand. The new cameras feature a unique capture-upon-release feature that makes capturing images steady, sharp and simple. Each camera also features a tactile image capture confirmation. With a short vibration telling you that an image has been captured. Capture buttons are located on the top and bottom of the cameras. The cameras also feature a motion sensor that automatically turns the cameras on and off.

[CamX Spectra](#) is the only caries detection aid that uses fluorescence technology to visualize and discover caries earlier, as well as plaque and calculus. [CamX Elara](#) features 8 white LEDs and is always in focus from 5-35 mm, making the camera easy to use and eliminating the need for further adjustments.

[Air Techniques](#) offers an entire line of digital imaging products as well as an infection control line and is the leading dental manufacturer of dental vacuums and air compressors systems in North America. [Air Techniques](#) distributes their products globally through a large network of dealers. For more information on Air Techniques, please visit: www.airtechniques.com.
